

V-Scrub R.E.S.

Heavy Duty Cleaner for Rust, Efflorescence and Leaf Stains.

V-SCRUB R.E.S. cleans and etches concrete and masonry with industrial strength designed to tackle even the toughest cleaning jobs. V-SCRUB R.E.S. cleans stubborn rust, efflorescence and leaf stains, as well as mold, mildew and algae. V-SCRUB R.E.S. is more user-friendly than unformulated solutions or straight muriatic acid. V-SCRUB R.E.S. is also suitable for preparing concrete and masonry surfaces prior to sealing or coating. May cause discoloration, especially on dark surfaces. May etch plastic, metal, glass or other surfaces. May cause damage to grass and plants. Immediately rinse with clean water.

Surface Preparation: Remove dirt, dust, grease and oil by washing with heavy duty cleaner, such as V-SCRUB HD. Allow surface to dry.

Mixing: To remove rust, efflorescence and leaf stains dissolve 16 oz of V-SCRUB R.E.S. into 1 gallon of warm water. To etch concrete as preparation for sealing or coating dissolve 16 oz of V-SCRUB R.E.S. into ½ gallon of warm water. Do not use a galvanized container. Skin and eye protection is advised.

Coverage: Use as required up to 300 sq ft/g.

Application: To remove rust, efflorescence, or leaf stains apply V-SCRUB RES with a roller or sprayer. Allow to dwell 5-30 minutes. Brush with stiff broom. Flush very, very thoroughly with clean water. Repeat if necessary.

Caution!: Contains sulfamic acid. May irritate nose, throat and skin. Avoid contact with skin and eyes. In case of eye contact flush immediately with clean water. Call physician. If difficulty breathing, move to fresh air. If breathing difficulty persists call physician. May be harmful if swallowed. If swallowed give 1-2 glasses of water. Call physician. V-SCRUB R.E.S. is acidic and should be handled with care.

USE THIS PRODUCT WITH CAUTION!
